Hospital Reproductive Health Services

Hospital name: Olympic Medical Center

Additional comments; limitations on services; other services (*continued*)

Some of the services listed on this form are most appropriately and commonly provided outside an acute care hospital setting. Some services are marked because they may be available under very specific patient circumstances.

Hospital Pharmacy - provides some types of contraceptives to practitioners for patient care; it is not a retail pharmacy dispensing directly to patients.

Infertility testing - some forms are provided; more complex cases are referred for specialty services.

Please contact the hospital with specific questions so that we may help.
