

Specialty testing not performed at the Olympic Medical Center Laboratory is sent to an independent reference laboratory.

Effective July 1, 2019, regulatory changes to billing guidelines require that certain specific testing is billed to the patient directly from the reference laboratory.

If you have any questions following receipt of a bill from one of our reference laboratories, please contact the customer service number listed on your statement.

Additionally, you may contact Olympic Medical Center Patient Financial Services at (360) 417-7111.
